## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Receipt is acknowledged of the amendment filed 12/22/2004, and information disclosure statement filed 02/24/2005.

The rejections under 35 USC 112, first and second paragraphs are hereby withdrawn.

The following rejections are based upon the IDS filed 02/24/2005.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-32, 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen (Trends Pharm. Sci).

Allen disclose the method of targeted delivery utilizing a liposome (cavity-forming moiety) containing doxorubicin (see Abstract). Specific targeting can be furthered by inclusion of specific antibodies attached to the liposomes (see page 217). Specific cell surfaces are targeted. As shown by Figure 3, on page 219. The sterically stabilized S-immunoliposome targets a specific cell surface antigen (a protein). As such, the Allen reference anticipates the instant claims.

Claims 29-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Wagner et al.

Wagner et al disclose the use of liposomes linked to transferring (see Abstract). Wagner et al therefore disclose a cavity forming moiety, and a target binding moiety. The transferrin may be conjugated to DNA for transport of these sequences into cells. This mechanism works by receptor-mediated endocytosis, which involves targeting, and binding to specific cell surface proteins, in this case receptors.

Claim 34 is objected to as dependent upon a rejected base claim.

### ***Conclusion***

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 02/24/2005 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
